ACS Consolidated Group

The ACS Consolidated Group (ACSCG) is the global leader in aviation safety, auditing, consulting, training, recruitment and finance.

ACSCG successfully leverages off in excess of 400 years collective international aviation industry experience. We work closely with our valued clients, ensuring that they successfully meet their objectives by drawing on our suite of highly experienced aviation professionals and innovative services.

ACSCG prides itself on working closely with its clients in achieving objectives. We have successfully completed hundreds of projects globally, with both large international carriers and small local charter operations. ACSCG has developed a comprehensive and highly effective project management approach in addition to keeping abreast of the latest thinking and best practice. Our clients appreciate the high quality standards and excellent results our specialised staff and innovative services deliver.

ACS Auditing

ACS Auditing is IATA Accredited, enabling us to provide IOSA and ISAGO auditing services. Both IOSA & ISAGO are recognised audit processes developed by IATA in conjunction with leading international airlines, ground handling providers and industry bodies.

ACS Auditing ensures our valued clients deliver a superior level of safety and compliance in their operations, policies and procedures. Our innovative auditing services will ensure that aviation organisations of all sizes, successfully improve the implementation of internal procedures and comply with the regulations and standards governing their operations.

ACS Auditing has conducted more than 150 successful Audits on major international airlines and local charter operations, using the most experienced and professional auditors in the industry. Our professional Auditing Services provided by our expert team ensures company stakeholders, customers, regulatory bodies and most importantly the flying public, continue to have every confidence in the global aviation industry.

AC&T Services

AC&T Aviation Consulting Services

AC&T Aviation Consulting Services provides cost effective and innovative solutions for the global aviation industry. AC&T has developed a comprehensive and highly effective project management approach, which is utilised when undertaking our best practice consulting programs. Our comprehensive range of consulting services encompasses all aspects of Safety and Risk Management and Airport and Flight Operations. We pride ourselves on working closely with our valued clients in achieving objectives.

AC&T Aircraft and Aircraft Lease Management

AC&T's professional consultancy services include providing lease agreement delivery/redelivery contract review, management and hands on technical assistance in the aircraft leasing environment. AC&T understands the finance requirements of aircraft owners, operators, service providers and manufacturers through appropriate asset management. With a combined management, technical and operational background, along with over 400 years of collective experience, AC&T consultants provide our clients definitive direction in making informed, cost effective decisions regarding their valuable aviation assets.

AC&T's Manual Documentation Services

Designing, developing and updating manuals are some of the most time consuming tasks in maintaining compliance systems. AC&T's expert team of technical writers, desktop publishers and editors can develop new manuals or review and amend existing manuals and associated documentation efficiently and effectively.

IOSA Registration Assistance

AC&T provides expert assistance to our valued clients in the global aviation industry, ensuring they conform to rigorous IOSA Standards Manual requirements necessary to receive IOSA registration. This includes, at a minimum, the development of systems to document and to implement the IOSA Standards.

ISAGO Certification Assistance

AC&T provides expert assistance to our valued clients in the global aviation industry, ensuring they conform to rigorous ISAGO Programme requirements necessary to receive ISAGO certification. This includes, at a minimum, the development of systems to document and to implement the ISAGO Standards.

AC&T Training

All AC&T instructors have many years of experience providing specialised training to the aviation industry. AC&T's reputation for delivering excellence in this field is underpinned by the extensive aviation operations experience of our highly skilled personnel. We offer comprehensive services in training needs analysis, customised program delivery, evaluation of training outcomes and recommendations for ongoing workforce development. AC&T also provides a suite of tried and tested courses, or can develop training programs to meet our clients' specific requirements.

Aviation Solutions Recruitment (ASR)

ASR focuses on recruitment solutions, designed to meet the exacting needs of the aviation industry. ASR delivers specialised recruitment services to aviation organisations of all sizes to ensure the right aviation professional is selected for the available position. ASR maintains comprehensive recruitment screening processes, developed and conducted by highly skilled and experienced aviation professionals. ASR recruiters have a collective experience of over 200 years in the aviation industry. It is our people and highly regarded professional standards that make the difference.

Aviation Finance Solutions (AFS)

AFS offers an entirely new and innovative approach to the structuring of finance for all types of aircraft and industry related equipment. AFS's range of financial services reflects the unique nature of the aviation industry. Our approach ensures that we deliver the most professional and cost effective solutions for our wide range of aviation customers who benefit from our extensive knowledge and experience.

AFS offers tailored financing alternatives to suit the individual needs of our customers, across all continents. We finance a wide selection of new and used aircraft ranging from small single engine aircraft to large jet aircraft, aviation parts and related equipment.
